Batch Mode / Memory Mode

1560P Bluetooth barcode scanner comes with setup cards in box.

User needs to use one of cards for batch operation.

The batch mode is called memory mode for 1560P.

1) Enable memory mode,
2) Clear existing data in memory
3) Collect barcodes
4) Position cursor in excel or word ..... scan "upload" barcode to start send data to PC
5) After uploading completed, scan "clear data" barcode & "confirm " barcode to delete data in memory for next data collection
6) Please remember to scan "disable memory mode" barcode to exit memory mode & return to normal Bluetooth operation.
